

Take advantage of free outdoor cooling with NUTECH's

"SUMMER CORE"

Features:

- Unique design allows air to pass through the core without transferring heat, taking advantage of the cooler summer nights.
- Easy to install. It simply slides in place of the existing heat exchange core.
- Proven performance
- Low maintenance
- **Lifetime** warranty

The "Summer Core" is designed to be used in climates that can take advantage of the cooler summer night air.

During the hot summer days our homes can become uncomfortably warm. Now, by replacing your traditional heat exchange core with the "Summer Core", you can bring in the cooler air from outside ... whenever it's available.

Part No. 68-251 Summer Core - model 100DEF only

Part No. 68-250 All other models

Note: A 24 Hr. Programmable Timer could be used as an **OPTIONAL CONTROL** when a Summer Core is installed.
